

Strategies for supporting pupils with Special Educational Needs and Disabilities in Mathematics lessons.

Individual Need	Here's how we help everyone shine
Attention Deficit Hyperactivity Disorder	A non-confrontational approach will be used in every aspect of the maths lesson
	Adult support during the key skills (KIRFS) and Flashback 4 sessions where children are using whiteboards to record their answers
	Verbal praise is given whenever necessary to help boost confidence and self esteem
	Use of pictorial representations to support the learning taking place
	We use concrete resources to support new mathematical concepts
Anxiety	A trusting relationship will be nurtured between all adults in the classroom and the child
	This relationship will enable the adult to know any triggers or changes in behaviour that may be caused by the child feeling anxious
	Giving feedback or answers is always a non-compulsory option during any maths lesson so that children are not
	'put on the spot' or made to feel pressured or uncomfortable
	Maths lessons are calm and quiet where children can focus on the learning taking place
	If children feel overwhelmed by the classroom environment, they can use a quiet break out space
	Pre-teach sessions to help alleviate worries

	Usual timetables are used to support the organisation of the maths lesson
	Visual cues/resources are used to support the child as necessary throughout the session
	 A learning space is provided that best suits the child There is a consistent approach to the maths lesson with
Autism	any changes discussed with the child beforehand
Spectrum	Sensory breaks are given whenever necessary
Disorder	 Mathematical vocabulary is integrated into the lesson throughout, with visuals to support new language
	Staff avoid asking specific or direct questions that focus on the child's mathematical understanding that may make them feel uncomfortable
	Staff ensure that the child has a clear goal for what they are expected to achieve during the maths lesson
Dyscalculia	Concrete resources and manipulatives are always made available and are clearly, labelled and accessible

Adults will ensure children understand how to use these manipulatives to support the specific learning goal
If a slideshow is being shown, an individual laptop will be provided so the child can follow the presentation successfully
Knowledge organiser to aid memory and independence
Key Skills sessions incorporate activities that specifically focus on recall and repeating areas of mathematics the children have already explored
Graph paper can be provided for written calculations (i.e. long division)
Rulers and highlighters will be used to visually support the drawing/organisation of written calculation methods
Peer and adult support will be built into the lesson throughout to support any corrections with recording
dictated numbers/number formation
Peer teaching will be used as a great way of the child sharing new knowledge that has been learnt

	1	1
		Different coloured paper can be provided for any written recordings
		A text font size of 12 or above is used for any work sheets/PowerPoint presentations
		Questions will be short with visual representations (diagrams, pictures, illustrations) to support
Dyslexia	0	Data, charts and diagrams are clearly organised and structured
		Specific clear, rounded and spaced out fonts are used on any writing within the lesson
		Large spaces for working out will be provided under each question given on a work sheet or in a maths book
		A large learning space will be provided
		Instructions can be written out for the child, using different colours for each line
Dyspraxia		Diagrams will be provided before labelling/editing Suitable time limits will be given for all home learning for maths Children can leave the maths session early to ensure there is time to move in and out of the classroom (break times, lunchtimes, toilet trips etc.)
, .		Children can move around the classroom whenever necessary
		When using mathematical equipment, an adult or supportive peer will provide demonstration of how to successfully use the equipment
		Adults will ensure they are watching closely for signs of distress and provide a quiet, calm learning environment
Hearing		A suitable working space will be agreed upon between the teacher and child in a safe, private conversation before the lesson
Impairment		Adults within the classroom will ensure the child's hearing aid is turned on before the lesson begins
		Adults will ensure they are facing the child when they are talking/giving instructions
		Questions and any information given by peers will be repeated clearly to ensure the child has heard what their peers have asked/said
		Children will be seated towards the front of the classroom to ensure they have a clear line of vision, especially during the input where the whiteboard will be the main focus

Toileting Issues A seating arrangement will be made so that the child can enter and leave the classroom discretely All adults and children within the classroom environment will respect the child's privacy Learning is differentiated to meet the child's specific 'learning gaps' Knowledge organiser to aid memory and independence This will ensure that the task being given to the child matches their individual academic needs Concrete resources and visual representations will be given to the child to support any mental and written calculations needed Self-checks can be used at each stage of a task so that children are aware of the tasks required of them and the achievement of reaching this Key vocabulary and ideas will be addressed regularly throughout the maths lesson to check understanding Information will be repeated clearly, varying the vocabulary used SMART pages and PowerPoint slides will be simple and uncluttered with key information highlighted

activities/opportunities			·
 Visual timetables, signs and symbols will be used to 			Children will be provided with a 'work-buddy' during peer activities/opportunities
support communication within the maths lesson			
 Visual displays (maths working walls) will be used to 			Visual displays (maths working walls) will be used to
Speech,	•		support understanding of key information
Language & Don-verbal clues will be used to back up what is being said	Communication		·
Needs Any verbal instructions/information will be at a slow, clear pace that matches the child's understanding	Needs		Any verbal instructions/information will be at a slow, clear pace that matches the child's understanding
 Adults will regularly check the child's understanding so that adults can identify any misconceptions or misunderstandings 			that adults can identify any misconceptions or
 Adults will listen and respond to the child with support and understanding 			Adults will listen and respond to the child with support and understanding
Tourette Syndrome A structure will be provided (tick list) to support the learning taking place, this will be differentiated to the maths activity and include the main elements needed to aid the child's attention			learning taking place, this will be differentiated to the maths activity and include the main elements needed to
There will be understanding that the activity may not be completed		0.1	, ,

Experienced Trauma	The maths learning environment will be a calm, trusting place where children feel supported with their emotions at all times
	Adults working with the child will be aware of any triggers and any ways to further support the child within the classroom
	There will be a consistent approach to expectations and behaviour that are based on positive praise.
Visual Impairment	Anything that is being displayed (PowerPoint presentation, maths working wall) will be large and easily visible from anywhere in the classroom
	Children will be able to 'take a break' from their maths learning whenever needed to ensure they are able to focus visually and avoid fatigue
	Images and text within any printed work will be enlarged with the recommended font size
	Children will be provided with a thicker and darker pencil to ensure their writing is clear
	Children may be provided with a larger squared exercise book if preferred
